

## For safety and quality purposes, tighter controls for load entry and inspections now apply.

As part of the Resource Recovery Centre's (RRC) quality assurance program for its products and aligned **safety** issues, **tighter controls** are to be introduced from **1 July 2008** for the acceptance, handling, processing and storage of materials received and products available for sale at the RRC.

Products (including mulches, composts, soils, crushed masonry and wood chip) are to be accredited under applicable **Australian Standards** and relevant guidelines. An important part of this process is to ensure loads that are accepted at the RRC are **not contaminated** with materials that will affect our end products, such as hazardous materials or waste that we are not licensed to accept.

Customers must now wait for an Attendant to be present **BEFORE** any tipping commences. We apologise for any delays you may experience and thank you for your **co-operation** with this important change in procedures.

Improved resourcing, tipping areas, separation methods and training will be implemented along with the changes to ensure **maximum efficiency** and **minimal disruption**.

Customers will be asked to sign a **Disclaimer** certifying that their loads do not contain any prohibited articles such as **asbestos** or suspected asbestos products, **gas bottles**, **chemicals** or any potentially **hazardous** materials.

If you have any questions please direct them to the **Administration Office** or call **4868 0555**.

**Reviva! Centre - Open Monday, Wednesday, Friday and last Saturday of the Month, 9am - 3pm.**

The Reviva Centre sells all sorts of items that have been salvaged from the waste stream or discarded directly. A wide range of items are generally available from refurbished computers and furniture to sporting equipment, books, magazines, clothing and the list goes on and on. The Reviva Centre is well worth a visit and your sure to pick up a bargain
